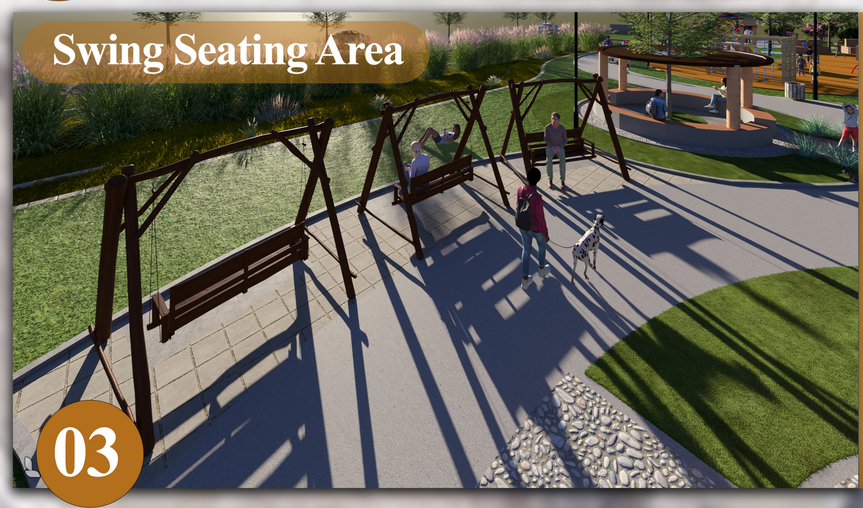
Designed to enhance the trail system, the park provides facilities for walkers, cyclists, and those arriving by car. Convenient parking, natural beauty, and several rest stops along the way make it a welcoming spot to stop and connect with nature

A welcoming area where cyclists can safely park their bicycles, use a maintenance station, and take a break. The space is designed for easy access and visibility, promoting relaxation and active living in the park.

A vibrant and secure playground area for imaginative play and physical exercise. The colored, padded ground is secure, and a variety of play equipment invites children of different ages to join in.



Comfortable swing benches create a peaceful environment for visitors of all ages. Placed on the main path, this seating area invites residents to pause, enjoy the view, interact with others, and appreciate the beauty of the nearby prairie landscape.

Covered picnic tables provide shaded spaces for family gatherings, outdoor meals, and social events. This feature enhances the usability of the park throughout different seasons and weather conditions.

A natural meeting spot for rest and conversation is created by the covered circular seating structure. Additional shade is provided by integrated trees, which further demonstrates the park's dedication to sustainability and comfort.

Placed at the entrance of the park, a distinctive sculpture of art welcomes visitors and creates a strong visual identity for the park. Surrounded by colorful landscaping, it also serves as a landmark and a photo opportunity.

Strategically located chess tables offer scope for mental exercise and friendly competition. This feature promotes intergenerational interaction and gives people a reason to stay longer in the park.
